LEXMARK™

AccuRead OCR
Quickly create searchable files and editable content

Business challenge

Today, businesses of all sizes struggle to create searchable data and editable content from unstructured source materials, like invoices, contracts and job applications. Many resort to inefficient and error-prone manual solutions, like rekeying, in order to get this information into their workflows.

Lexmark's advantage

In less time than it takes to enter data manually, your organization can create searchable files or editable content using our AccuRead OCR app. It installs easily on the MFP so you can use it within other Lexmark applications like Scan to Email, Scan to Network and Scan to Network Premium. Your OCR documents can also be integrated into more complex routing scenarios when combined with Lexmark Solution Composer.

There's no need for desktop applications or complex server-based software. This embedded app helps you easily find the unstructured digital information you need—at the moment you need it—by creating searchable PDFs that speed up the search process.

What are the advantages of Lexmark AccuRead OCR?

- **Eliminates OCR software**
  MFP converts printed pages to rich text without PC software
- **Increases productivity**
  Create searchable files in fewer steps at the MFP
- **Improves responsiveness**
  Instantly generates plain text for use with databases and websites

Ideal for:

- Accounting
- Facilities
- Human Resources
- Public Safety
- Legal
- Purchasing
- Marketing

Features

PDF

Create searchable PDFs. *By using Lexmark AccuRead OCR to create searchable PDFs, you can add context to documents instantly, making it faster and easier to locate the content you need.*

RTF

Repurpose printed information. *Significantly reduce the time it takes to convert your printed information into a rich text format compatible with Microsoft® Word.*

TXT

Convert text easily. *Improve productivity with an easy-to-use text conversion feature that lets you import the extracted text into your core system or database.*

Part Number	82S0533
Memory	512MB (minimum) 1024MB (recommended)
Hard Disk	Required
OCR Capacity	Based on size of automatic document feeder (ADF)
Supported Formats	Searchable PDF, Rich Text Format (RTF), Text (TXT)
