

Lexmark Introduces New Mobile Workflows App

NewsByte - Feb. 21, 2012— Lexmark International, Inc. (NYSE: LXX) will preview its new [mobile workflows app](#) today at the HIMSS conference in Las Vegas at booth #5531. The app enables rapid creation of custom mobile workflow solutions that simplify business processes in healthcare and other industries.

Lexmark's solution allows business users to easily create custom workflows – such as clinical photo capture, incident reporting or travel and expense processing – and rapidly share them with their workforce via the mobile workflows app for smartphones and tablets.

With the Lexmark mobile workflows app, you can:

- Develop and deliver solutions in minutes, not days or weeks
- Create many custom workflows and run them all using one app, regardless of the device or operating system
- Send custom solutions via email to any mobile device that has the Lexmark mobile workflows app installed

The Lexmark mobile workflows app will be available next quarter.
