

Lexmark introduces Accessibility Speech Solution, empowers visually impaired users

NewsByte - March 12, 2012—Lexmark International, Inc. (NYSE: LXX) today announced the [Lexmark Accessibility Speech Solution](#), which expands Lexmark's usability enhancements for visually impaired users. This solution helps visually impaired users better understand the status of their printer and how to remedy any issues.

The Lexmark Accessibility Speech Solution:

- Saves time by empowering visually impaired users to understand the status of print jobs on Lexmark printers and multifunction products
- Saves money by reducing the need for highly specialized equipment to accommodate the printing, scanning and faxing needs of visually impaired users
- Can be used in conjunction with Lexmark's [award-winning](#) Accessibility Solution that allows users to set up copy, fax, email, FTP and scan jobs directly from their workstation

The Lexmark Accessibility Speech Solution is available now.
