

# Catalyst Adopts Perceptive Document Filters to Achieve Powerful, Simplified E-Discovery

**Fortified solution empowers users to search millions of documents in countless formats and variations, delivering visibility to crucial content quickly**

SHAWNEE, Kan.

## News Facts

- Lexmark's [Perceptive Software](#) announces that [Catalyst](#)—a provider of secure, cloud-based software addressing the e-discovery, compliance and regulatory needs of Global 2000 corporations and their legal counsel—has licensed [Perceptive Document Filters](#) as a key component of its [Catalyst Insight](#) platform.
- Catalyst Insight empowers users to organize, cull and produce documents quickly, regardless of format, language and programs of origin. Implementations may involve millions of unique documents, and Perceptive Document Filters was selected due in part to its ability to make this content searchable for immediate recall and review.
- Catalyst cited speed and implementation time as being key metrics relating to the company's long-term business growth. The Insight platform extracts text and meta-data, and makes documents ready for searching and review, in addition to creating web-friendly versions of common business files; Document Filters speeds and streamlines this process for customers.

## Supporting Quote

- "We are excited to be able to integrate Perceptive Document Filters into the Catalyst Insight platform," said Bruce Kiefer, vice president platform, Catalyst. "Our customers load millions of documents onto our platform so that they can make critical business decisions based on the electronically stored information within them. Using Catalyst Insight, and the information unlocked by Perceptive, helps our customers reduce their costs and risk, save time, and simplify their processes."
- "Catalyst customers—and other global businesses—face significant e-discovery, compliance and visibility challenges as they conduct business across any number of regions, business units and financial operations," said Brian Anderson, chief technology officer, Perceptive Software. "The explosion of unstructured information across disparate repositories adds to the complexity. Perceptive Document Filters empowers the global enterprise to quickly pinpoint precisely the content that's needed, regardless of location, format or language. By making this capability a cornerstone of its e-discovery platform, Catalyst is prepared to serve the largest and most demanding companies across the globe."

## About Catalyst Repository Systems ([www.catalystsecure.com](http://www.catalystsecure.com))

For over 15 years, Catalyst has been a pioneer of delivering secure, cloud-based software to help corporations and their law firms take control of e-discovery, compliance and regulatory matters. Catalyst helps to ensure repeatable, defensible and measurable business processes that provide cost reduction and predictability, greater control over the e-discovery process and better visibility. The Catalyst Insight E-Discovery Platform and Insight Predict enable clients to successfully work with a single matter and seamlessly migrate to multi-matter discovery within the same software platform. A pioneer in global language e-discovery, advanced search and analytics methodologies, Predictive Ranking and big data e-discovery, Catalyst has served many of the largest companies and law firms in the world.
