

# EllisDon Selects Perceptive Software for Accounts Payable Automation

## Intelligent capture technology to provide efficiency boost in conjunction with ERP implementation project

LENEXA, Kan.

### News Facts

- Lexmark's [Perceptive Software](#) announces that EllisDon, an Ontario-based provider of construction and project management services, has selected Perceptive Capture for the automation of accounts payable documents, including more than 400,000 invoices annually, as the company pursues implementation of a Gate Three ERP system across the enterprise.
- Initially, Perceptive Capture will be used for extraction of non-purchase order-based invoices, minimizing the need for manual data entry and enabling rapid routing of invoice data for approval by the appropriate parties. As EllisDon's ERP project matures, there will be a greater emphasis on PO-based invoices, whereby Perceptive Capture will support touchless processing of data, from receipt to post.
- EllisDon cited the software's capabilities for effective exception handling, high rates of accurate extraction, effective interactions with a myriad of content repositories, and EllisDon's ability to maintain the system using internal IT resources as being key to the company's decision to select Perceptive Capture.

### Supporting Quote

"Perceptive's solution offered a fast, simple mechanism for viewing, correcting and validating invoice data as needed, without manual preparations," said Joe Jagodich, EllisDon vice president and CIO. "We can configure and manage the system using our own staff, resources that will no longer be tied up by manual keying and hunting for missing documents. As we shift our accounts payable to a purchase order-enabled system, we anticipate the capture technology will enable high rates of throughput—beyond what might be accomplished with greater headcount alone—as a result of its high functionality for line-item capture and pairing."

### About EllisDon

EllisDon is an employee-owned construction services company that delivers construction expertise to clients throughout the world. Incorporated in 1951, EllisDon has distinguished itself through innovative people and practices. Today, the company offers construction and project management services, in addition to a range of solutions in design, operations, sustainability and information technology.
