LEXMARK MONOCHROME LASERS 'SET NEW STANDARD,' EARN EDITOR'S CHOICE AWARDS

LEXINGTON, KY. –12/23/2008

Featured in the 2009 Office Laser Printer Guide, Lexmark International, Inc.'s (NYSE: LXK) newly introduced monochrome laser printers have received distinguished Editor's Choice awards from Better Buys for Business, an independent reviewer of document imaging equipment.

The Lexmark T650, E260, E360 and E460 Series were recognized for their range of features, impressive print speeds, value and eco-consciousness such as standard two-sided printing* to reduce wasted pages, Eco-Mode to reduce power consumption and cartridges that are easily recyclable through the Lexmark Cartridge Collection Program.

LEXMARK T650 SERIES

The Lexmark T650 Series of monochrome laser printers, with prices ranging from $699** to $1,629**, is backed by an award-winning sixth generation print engine. The series is designed to deliver high-quality pages fast and reliably, and can handle complex media such as labels and lower-grade papers. Print speeds range from up to 45 pages per minute (ppm) on the Lexmark T650n, T650dn and T650dtn to up to 55 ppm on the Lexmark T654n, T654dn and T654dtn.

"These printers set a new standard for high-end, large-workgroup printing with outstanding new technology," said Stephen Hannaford, Better Buys for Business editor-in-chief. "The Lexmark models more than hold their own against the HP ones."

LEXMARK E260, E360 AND E460 SERIES

Targeted to small and medium businesses, the Lexmark E Series monochrome laser printers pack productivity-enhancing features into a sleek, quiet and compact design that easily fits on a desktop. The Lexmark E Series prints at speeds up to 35 ppm on the E260 models, and up to 40 ppm on the E360 and E460 models, with prices ranging from $199** for the E260d to $699** for the E460dw.

All of the printers in the E Series feature built-in automatic two-sided printing and an instant warm-up fuser to help reduce electricity consumption while ensuring the first page prints quickly. The E260dn, E360dn and E460dn are network-ready. In addition, the Lexmark E460dw offers integrated wireless printing and is Wi-Fi CERTIFIED™ 802.11n draft 2.0***.

"These machines set a high bar for the competition," said Hannaford. "Every new release of Lexmark's E Series printers seems to set a new standard for speed and functionality in the class of low-cost small-workgroup machines."

"The numerous accolades for our monochrome laser printers over the years demonstrate that our customers can depend on these products time and time again for fast, reliable, high-quality printing," said Marty Canning, Lexmark vice president and president of its Printing Solutions and Services Division. "It's an honor to have these products recognized with Editor's Choice awards."
