

LEXMARK'S NEW HOME AND STUDENT SERIES AIOS HELP FAMILIES MAKE THE MOST OF PRINTING TECHNOLOGY

Lexmark International, Inc. (NYSE: LXX) today introduced three new fully featured all-in-one (AIO) inkjet printers as part of its Home and Student series, which is designed to help families save time and money.

"With our Home and Student line of printers, Lexmark has embedded smart and practical features so families can finally enjoy a great printing experience without the common headaches," said Paul A. Rooke, Lexmark executive vice president and president of its Consumer Printer Division. "Fast and easy to install, the newly launched AIOs help meet every family member's unique printing needs at an affordable price point."

As more homes become "multi-computer" households, smart parents can save money by investing in only one printer. With wireless inkjet AIOs such as the new Lexmark X4950 or X6650, all members of the household can work in their own space within the home but still share a centrally located wireless printer that can meet everyone's needs ¹. For families that want to share a printer but don't have a wireless network at home, the new Lexmark X5650 inkjet AIO has a front laptop port so users can quickly and easily connect their laptops when they are ready to print. So whether it's printing homework, driving directions, documents for work or tax forms, there is still only one set of supplies to purchase and one device to maintain.

Lexmark's Home and Student line of printers makes it easy for everyone in the family to extend their productivity and creativity. With a range of easy-to-use, affordable AIOs, Lexmark's new printers include smart features, fast and easy installation, and bright OLED displays. Other features include high-yield cartridge options and a one-year protection guarantee² that are friendly for both the wallet and the environment. The X4950 Wireless All-in-One even offers two-sided printing.

With today's introduction of the X4950, X5650 and X6650, Lexmark's Home and Student series will carry a total of six printers. The three new devices join an impressive existing lineup of highly capable yet affordable AIO printers that are already available in stores.

The Lexmark X4950 Wireless All-in-One is priced at \$149.99³ and features three-in-one capability (print, scan, copy), wireless, two-sided printing, a large 2.4-inch color LCD, an automatic document feeder (ADF) and up to 30 pages per minute (ppm) black and 27 ppm color⁴.

The Lexmark X5650 All-in-One is priced at \$99.99³ and features four-in-one capability (print, scan, copy, fax), a bright 2-inch OLED display, an ADF, front laptop port and up to 25 ppm black and 18 ppm color⁴.

The Lexmark X6650 Wireless All-in-One is priced at \$129.99³ and features four-in-one capability (print, scan, copy, fax), wireless, a bright 2-inch OLED display, an ADF and up to 25 ppm black and 18 ppm color⁴.

All three printers will be available starting in September.

Rooke's presentation is scheduled for 8:40 a.m. EDT. His remarks can be accessed live from Lexmark's investor relations Web site at www.investor.lexmark.com. The site will also offer a replay after the event.
