

LEXMARK INTRODUCES NEW COLOR LASER MFP TO ELEVATE OFFICE PRODUCTIVITY

LEXINGTON, KY. -01/15/2008

Lexmark International, Inc. (NYSE: LXX) today introduced the Lexmark X560n color laser multifunction product (MFP), giving business customers access to high-quality, professional color printing in an easy-to-use all-in-one device.

"The Lexmark X560n adds another option to Lexmark's award-winning line of color laser MFPs for customers looking to bring the power of color to their business," said Marty Canning, Lexmark vice president and president of its Printing Solutions and Services Division. "The X560n is also Energy Star certified, making it an ideal product for environmentally conscious customers seeking to make greener purchases."

Designed for customers who print and copy color documents frequently, the Lexmark X560n features business-class performance, printing at speeds up to 31 pages per minute (ppm) in black and 20 ppm in color in addition to fast copying and robust fax and scan capabilities for \$999*. It includes networking standard so that it can be easily shared by multiple users to consolidate devices and help customers save energy usage and money on supplies and maintenance costs.

With the Lexmark X560n, businesses can quickly and affordably print professional color presentations, brochures, invitations, labels and signage in house without having to incur the expense and extra time involved with outsourcing documents to a local copy shop. To further improve productivity, the Lexmark X560n features a 50-sheet automatic document feeder to make faxing, scanning or copying multiple-page documents faster and more efficient.

The Lexmark X560n is easy to maintain and operate, and features the highest-yield cartridges and lowest supplies intervention rate in its class. The Lexmark X560n is the first color laser MFP under \$1,000 to offer 10,000-page** aftermarket toner cartridges in all four colors to help give customers a low cost-per-page and minimize environmental impact because of the need for fewer cartridges. In addition, Lexmark's free Cartridge Collection Program, which is available in more than 50 countries, allows customers to return used toner cartridges to Lexmark at no additional charge for reuse or recycling.

The Lexmark X560n also includes software to help customers easily scan, share and organize documents. Customers can use the software to convert scanned documents to a standard PDF format or transfer a document's contents into a spreadsheet or word processing file using Optical Character Recognition. To help save even more time, the software allows customers to scan documents directly into applications on their PC.

Fast, robust and affordable, the Lexmark X560n is ideally suited for medium and large workgroups that need color and anticipate a monthly print volume of between 1,000 and 5,500 pages. It is available immediately through Lexmark's channel partners and at www.lexmarkstore.com.
